# Fingerprint Scanner- TF1700

The most versatile fingerprint terminal used for Time & Attendance monitoring.

- Eliminates 'buddy' punching
- Water resistant, making it suitable for outdoor environments
- Slim and elegant design for small spaces
- Fast and accurate with 1-touch, 1-second recognition
- Fixed unit with full access control features

# Fingerprint Scanner- S922

Manage your employees wherever they are. This unit is weather/ shock resistant.

- Convenient carry case with sturdy handle
- Rugged unit suitable for off-site or harsh environments
- No internet required
- USB upload of data to Micropay
- WIFI Integrated

# Facial Recognition- IFACE302

The most secure dual purpose fingerprint and facial recognition reader available today.

This modern unit uses 3D imaging technology and integrates directly with Micropay to provide accurate data for your payroll calculations.

- 100% Touch-free authentication
- Optional Fingerprint Access Control
- Verification and identification in less than 2 secs.
- Employee privacy is protected

# Facial Recognition- SPEEDFACE- V5

The SpeedFace – V5 is a high-speed time and attendance time clock with face and palm recognition and body temperature detection.

With rapid recognition speed employees can clock in for work in under 1 second.

- Touchless technology
- Temperature detection
- Masked facial identification
- Supports both facial and palm verification
- Sleek, compact design for easy installation

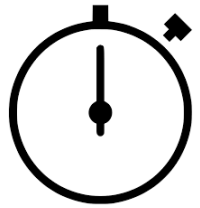

# Attendance Reports

TimeClock modules integrate with Micropay to generate the following reports:

- Employee Absenteeism Rate Report
- Employee Attendance Report
- Employee Late Report
- Leave Cost Report
- Leave Entitlement Report
- Shift Listing Report
- Shift Rostering Report
- Vacations Report

# Benefits

- Spend less time on payroll

- Prevent buddy punching

- Set various shifts within organization

- TimeClock information can be synced to Payroll

- Provide detailed labor data

- Easily calculate paychecks and avoid payroll errors
