

CHAMPIONS OF BUSINESS

Vibrant Technology Solutions Limited Business Technology Finalist

Since its incorporation in January 2007, Vibrant Technology Solutions Limited has been building a strong reputation and loyal clientele in the ICT sector, thanks to its determination to deliver exceptional standards of customer service. The company first introduced ICT project management and integrated services to clients in the local energy, telecommunications, finance, insurance, manufacturing and distribution sectors. Its reach has grown considerably over the years, to serve other Caribbean markets – including Guyana and Suriname – as well as clients in North America.

Founders Timmy Chin and Kirti Mohammed pride themselves on the company's ability to add value by going beyond project requirements. Vibrant's ability to deliver on this brand promise is based on the premise that every problem has a solution; when you listen to the customer's needs and understand the gaps, the right solutions emerge, creating an enhanced customer experience. The team firmly believes that with proper communication, valuable time and money are saved.

Vibrant takes a common-sense approach to problem-solving, custom-designing solutions for clients and introducing them to methods that create greater efficiency. Solutions are always flexible, and structured around each customer's requirements and budget, all in line with the highest international standards. Because the company also strives for cost effectiveness when managing each project, clients find that they can seamlessly continue normal operations with no interruption.

The company takes its role as a responsible corporate citizen seriously. Vibrant fosters a culture of giving back; as such, it has supported a number of social responsibility initiatives, including the sponsorship of youth cricket tournaments and other sport-based initiatives, co-hosting a free dental clinic with Dental Smiles, helping with infrastructural upgrades to a home for children with disabilities, and assisting flood and fire victims. The company has also implemented an in-house recycling programme: the office is paperless, and its staff recycles glass, waste and e-waste.

Vibrant Technology Solutions continues to bring its energy to everything it undertakes, a wonderful reminder that technology is nothing without people.

The Trinidad and Tobago Chamber of Industry and Commerce (host of the Champions of Business Awards) and bmobile (Sponsor of the Business Technology category) congratulates Vibrant Technology Solutions Limited on being selected as a finalist in the category of Business Technology on November 15, 2019.
