About Us

Scipio Technology Limited designs and develops software products and cloud applications for clients in various organizations including government, private sector, and SMEs.

We are an Information and Communication Technology (I.C.T) company with over 10 years of digital systems implementation and management.

ALIGNMENT THROUGH DIGITAL TRANSFORMATION

Our software is developed having thorough understanding of the needs and the strategic direction of your organization in driving the digital transformation, efficiency and to enable your organization to provide greater value to its stakeholders.

Additionally, our software is: People-oriented: Our software is carefully designed to include the roles and function of the various stakeholders within your organization and all requirements and users' information are documented and fit-for-use.

Process-driven and Responsive: Through our agile methodology we can continuously develop and improve the software with new features and requirements as directed by the government, ministries, and relevant agencies. This is managed via our SaaS that enables you to achieve added-value- similarly to the functions of Microsoft Office, SharePoint etc.

VISION & MISSION STATEMENT

Vision

To be the pioneers of digital innovation and business systems throughout the Caribbean and Latin America.

Our Objective

To help our clients realize their business goals through technical innovation.

WHY US?

We are cognizant of the burning desire for companies to not only implement innovative solutions, but to have growth reflected in profits and human resources. The thrust toward digital transformation has proven to be a successful model used by many international companies that have now pivoted in their approach to their mode of doing business. The delicate nature of digital transformation should not be taken for granted, at the heart of our solutions is a holistic approach with the aim of ensuring that the organization's objectives of business and financial goals are realized.

Therefore, the selection of a key ICT partner is paramount to enable, facilitate and support such processes. Scipio Technology Limited hope to harness good software management and digital transformation leveraging our team of experts and best practices to help your organization in creating long-term value that benefits your company as a whole. The output of working with us includes greater transparency in operations, accountability, improved processes, data-driven business decisions. Today's business world is plagued with uncertainties, and risks that presents challenges to business operations and this was highlighted during Covid-19 pandemic.

WHY US?

The use of software and digital transformational activities that are tailored to your organization's needs and processes will improve your ability to manage and mitigate those risks and create business value. We see ourselves as your collaborative partner in having the combination of technical capabilities, industry experience, cultural insight, and a local presence in the market of operation. Our approach will help you reimagine the way you do business- fused with a fresh perspective to long-standing challenges, to help you envision and achieve- a future with significant growth possibilities

At Scipio Technology Limited we meet and exceed the above criteria with a local team that has been trained around the world such as Canada, England and here in Trinidad and Tobago.

Here are some of our critical attributes:

- Ten (10) plus years of software development experience
- Seven (7) plus years of government and state agency experience
- Successfully implemented large scale software projects within the government sector
- Successful implementation of projects within the private sector local and internationally

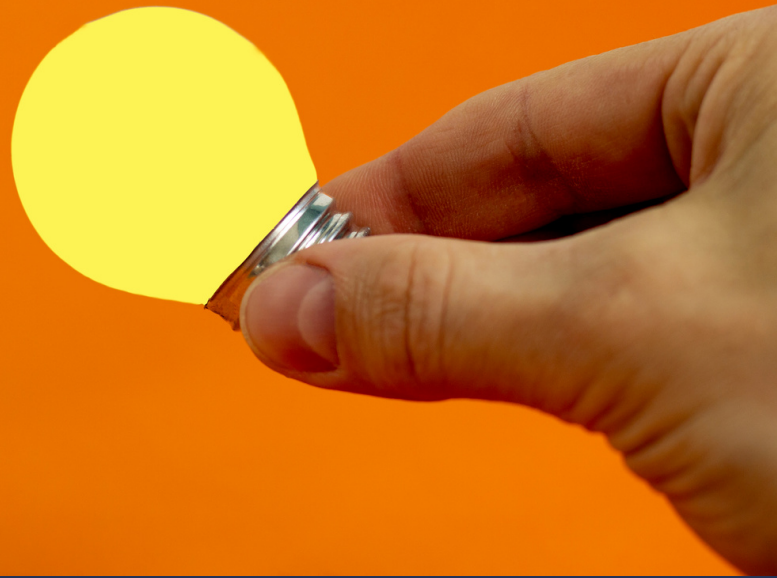

RECENT SUCCESS

Check out our success stories over the last 12 months:

- Re-engineered business processes for a state agency.
- Supported the digital transformation process within the organization.
- Facilitated extensive change management activities across the organization resulting in enthusiasm and support of the digital transformation projects.
- Developed modern websites for companies that is aligned with their communications objectives.
- Developed the first-of-its-kind HRMIS system for government that will equip management to effectively manage and support staff's performance in line with the government's vision to drive Public Sector efficiency.
- Designed and implemented cost-saving products that allow organizations to leverage data insights.

OUR SERVICES

- Digital Job letter system (Ministry of Education) • Digital Leave system (Ministry of Education)
- Student Management System (Ministry of Education) • Public Website (NIHERST)
- School Transport App • School Management System (S.M.S)
- GovHR (Human Resources Management System)

Cloud Solutions: Unlocking real and measurable benefits.

Our cloud infrastructure solutions are ideal for today's rapidly evolving digital landscape to aid organizations (medium to large) to have strategic advantage.

Our team will work with your organization to make it agile ready using our cloud-based services, including Change Management activities and process reengineering, to delivering a customized and secured cloud solution aligned with your organization's objectives.

Cloud Solutions: Unlocking real and measurable benefits.

Moving to Cloud Infrastructure Solutions, will unlock the following benefits:

1. **Cost Efficiency-** Save upfront that would be spent for investments in physical infrastructure and maintenance. Leverage financial opportunities through a pay-as-you-go model, reduce capital expenses, and optimize operational costs.
2. **Scalability-** Increase your organization's flexibility as you grow so that you can easily and effortlessly expand your resources, to meet increasing demands.
3. **Reliability & Availability:** Through our cloud solution, your organization will be able to have disaster recovery options, resulting in high availability and minimized downtime.
4. **Security:** We invest heavily in having robust security measuring including data encryption, access control, and compliance certifications. We will work closely with you to design not only a secure cloud architecture, but one that aligns with your specific security and compliance requirements.
5. **Enabled Innovative environment:** Through our cloud infrastructure your organization will empowered to experiment with new technologies and quickly adapt to ever changing market conditions.

Our Services

1. Cloud Infrastructure Solutions

Our approach includes:

- Comprehensive Assessment of your current IT infrastructure, identifying areas for improvement and optimization.
- Tailored Solution Design
- Seamless Migration to ensure minimal disruption to your operations.
- Ongoing Support and Optimization

Our Services

Cloud Infrastructure Solutions: Storage

Our cloud storage provides business opportunities when compared to that of physical storage, thus empowering today's organizations to truly transform in operations and processes, achieve, sustain and increase agility, reduce costs, and accelerate innovation. Benefits to be realized include

- Access the storage you need at a faster rate.
- Reduced the cost you spend on physical storage.
- Durable and resilience in data security that will protect and secure your organization's data.
- Safeguard against natural disasters and other risks including Fire.

Our Services

2. CRM

Our CRM delivers in creating:

1. Enhanced Customer Insights: Our CRM systems will give your organization the ability to consolidate customer data, providing key insights into your customers behaviour, preferences and needs. The added value of this creates personalized customer experience and develop lasting customer relationships.
2. Efficient Lead Management
3. Improved Customer Service
4. Centralized Data and Accessibility: Our CRM centralizes customer data, allowing only authorized team members across your organization to have access to accurate, up-to-date information and facilitate better decision-making.

Our Services
